# OLIVER DIAL: THE FUTURE OF QUANTUM COMPUTING

Public Lecture: Condensed Matter in the City 2023

You are cordially invited to attend a public lecture on the future of quantum computing. Oliver Dial, CTO of IBM Quantum will speak about the challenges, the science and the technological potential of quantum computing. He is the Chief Quantum Hardware Architect Technology Officer at IBM Quantum in New York, an IBM Fellow well known for his work in on large superconducting quantum processors, leading the development of IBM's first 20-qubit quantum processor.

All welcome. To register scan QR code.

**12th July 2023**

19.00 Clore Lecture Theatre

Huxley Building

Imperial College
