Nuclear engineer

Nuclear engineers design and build nuclear plants and the equipment used in them. They carry out maintenance work and monitor radiation levels from power plants and their surroundings. Nuclear engineers are also responsible for the safe disposal of nuclear waste. They are **collaborative**, **organised** and **communicative**.

Visual effects artist

Visual effects artists create computer generated characters, scenes and effects. They can specialise in areas such as film, television, commercials, games and immersive experiences. They often work as part of a team and may use both software and scripting or coding to create characters and scenes. Visual effects artists are **creative**, **imaginative** and **collaborative**.

Architect

Architects design buildings, spaces and places in all of the built environment. They work with a full team of professionals including structural engineers, civil engineers, quantity surveyors, interior designers, landscape architects and historic building specialists. Architects are **creative**, **imaginative** and **collaborative**.

Food technologist

Food technologists ensure that the food and drinks we consume are of consistent quality and safely produced. Food technologists are often involved in developing recipes, testing sample products and producing nutritional labels for food and drink products. They are **communicative**, **observant** and **curious**.

Energy analyst

Energy analysts support different parts of the energy team. They use energy data to accurately model what is happening in real life to enable the business to make decisions. They aren't just interested in how many kWh have been used, they also want to make sure that the energy has been used efficiently. They are **observant**, **communicative** and **logical**.

Astronomer

Astronomers study how the Universe works, from the origin of planets, stars and galaxies, to the understanding of cosmology. Astronomy is an interdisciplinary science that comprises physics, chemistry, computer science and mathematics. Theorists create computational and analytical models to develop new theories while observers design and carry out observing programmes to test theoretical predictions. Astronomers are **passionate**, **observant** and **curious**.
